

PowerlynQ Brand Logo Guidelines

Primary Mark (Connection / Synergy Icon) — Version 1 Refined

Brand Colors

Primary Navy: #0a1628 | **Cyan Accent:** #22d3ee | **Slate Gray:** #94a3b8

Use the navy + cyan combination for maximum recognition on dark social profiles and website headers.

Clear Space

Maintain a minimum clear space around the logo equal to the height of the cyan connection bar (approximately 1/8 of the icon height). Do not place other elements, text, or busy backgrounds inside this zone.

Minimum Size

- **Digital / Profile pictures:** 48 × 48 px minimum (prefer 128 × 128 or larger)
- **Print:** 0.5 inch (12.7 mm) minimum on the shortest side
- **Favicon:** 32 × 32 px is acceptable for the pure icon mark

Do's

- Use the dark background square version for X.com and LinkedIn profile pictures
- Prefer the full-color icon (navy + cyan + gray) on both light and dark website backgrounds
- Keep the horizontal lockup for headers, email signatures, and presentations
- Use the provided SVG masters for all web and print production
- Maintain the exact proportions and color values

Don'ts

- Do not stretch, rotate, or skew the logo
- Do not change the colors (no recoloring the cyan bar or chevrons)
- Do not add drop shadows, glows, or gradients to the official mark
- Do not place the logo on busy photographic backgrounds without a solid container
- Do not recreate the mark from scratch — always start from the SVG masters
- Avoid using the transparent version on low-contrast light backgrounds without testing

Delivered Files

- powerlynq-icon.svg — Master icon (dark background)
- powerlynq-icon-transparent.svg — Master icon (transparent background)
- powerlynq-icon-800-dark.png / 400-dark.png — Profile ready
